### CONNECTING YOUR BUSINESS WITH THE CONNECTORS YOU NEED

As a market leading manufacturer **DUPLEX CSA** understands that quality of the connection, both mechanically and electrically, greatly influences the performance of our customers' equipment.

Our DPX product family takes this to the next level. These products share many of the features our traditional connector portfolio provides. In addition, the specific design of their component parts allied with the selection of high-quality materials, provide the enhanced performance that is now often needed as standard.

The DPX range is already being selected as the connector of choice with customers operating in the satellite set-top-box, high speed cable modem, HFC network and general high-end equipment markets.

The investment made by Duplex CSA in these types of solutions can be seen in the performance of our products, and is ready to be utilised to meet your projects' critical demands.
